

# 2008 Community Needs Assessment Report

## laving the groundwork for our communities

Community Action Program of  
Evansville and Vanderburgh  
County, Inc.

## **ACKNOWLEDGEMENTS**

The Indiana Community Action Association would like to recognize and thank groups and individuals for their support and participation with the Community Needs Assessments:

- Each of Indiana's 24 Community Action Agencies, without their participation and resources, success on this project could not be achieved;
- The Indiana Housing and Community Development Authority, who funded these Community Needs Assessments in whole or in part with CSBG-D funds;
- The Indiana Community Action Association's Board of Directors Program Committee, who have provided valuable feedback and support on this project; and
- Special thanks are extended to Steve Hoffman with the Community Action of Northeast Indiana and Lora Olive and Jessica Fraser with the Indiana Community Action Association, for their dedication to making these Community Needs Assessments a success.

## **ABOUT THE COMMUNITY NEEDS ASSESSMENTS**

The Indiana Community Action Network (Network) is comprised of 24 Community Action Agencies (CAAs), which serve all 92 counties in Indiana. Every year, the Network analyzes community needs to identify strategies that will work best in addressing poverty.

Additionally, a full-scale Community Needs Assessment is completed by each agency every three years to identify major factors related to poverty and the needs of local residents and their communities. The first full-scale Community Needs Assessments took months of planning, training, research, and implementation of survey work, which resulted in a comprehensive look at the needs of the Network's service areas. The first full-scale Statewide and Agency Community Needs Assessments were completed in 2005.

These 2008 Community Needs Assessments are the second full-scale needs assessments to be completed. The 2008 Agency Community Needs Assessment reports look at each Community Action Agency (CAA) and evaluates how they are meeting the needs of their local communities. It is our hope that these Community Needs Assessments will provide valuable data to the Network and will help CAAs target their programs and services to address those with the greatest need in their communities.

## **PREFACE**

In order to better serve the low-income residents of the region, it is important that we maintain an up-to-date picture of who they are and what they need. To do this, Community Action Program of Evansville and Vanderburgh County, Inc. (CAPE) board and staff participated in a statewide study which was conducted by the Indiana Community Action Network.

The research was conducted in two parts:

- Background research was conducted using secondary data available from federal, state, and local resources.
- A client survey was designed and administered directly to Hoosiers who use CAPE services.

The findings are helpful to the CAPE board and staff who want to better understand CAPE clients and their needs. CAPE is using the findings to plan new strategies and services designed to help reduce poverty. CAPE is eager to share its findings with others who wish to serve low-income families in Southwest Indiana. The client survey respondents are a valid and reliable sample of the low-income population. This makes it possible for any community group to factor in these results when considering service for community programs and projects.

## Client Data and Survey Validity

### CAPE

#### 2008 COMMUNITY NEEDS ASSESSMENT

**DIRECT SERVICE STATISTICS** - The following demographic data was collected from each agency's Community Services Block Grant (CSBG) data as reported to the State and Federal governments. For more information see the Primary Data section of this report.

#### KEY FINDINGS

- Community Action Program of Evansville and Vanderburgh County, Inc. (CAPE) served a total of 13,991 households and 32,601 individuals in 2007.
- Eighty-six percent of all heads of households served by CAPE were working in 2007.
- Two-parent families totaled 2279 (16 percent) of all households served by CAPE in 2007.
- In 2007, single parent female-headed households totaled 5,377, accounting for 38 percent of all households served by CAPE.
- Four percent of households served by CAPE in 2007 were single-parent male-headed households.
- Forty-one percent of all people served by CAPE in 2007 were children. Of the 14,430 children served: 5,857 were 0 to 5 years old; 4,780 were 6 to 11 years old; and 3,793 were 12 to 17 years old.
- In 2007, CAPE served 1,652 senior citizens – those who are 70 years old and older. Seniors accounted for 5 percent of all people served by CAPE.
- Sixty-four percent of households served by CAPE had incomes below 75 percent of the Federal Poverty Guidelines (FPG) – \$15,487 for a family of four in 2007. Eighty-two percent of households served had reported incomes below 100 percent of the FPG – \$20,650 for a family of four in 2007. Only 18 percent of households had incomes above 100 percent of the FPG.

- Eight percent of the population served by CAPE also received financial assistance from other sources.
- Households served by CAPE were generally small in size, with 74 percent having only one to three members. The average CAPE household size was 2.3 in 2007.
- Sixty-eight percent of the households served by CAPE in 2007 lived in rental housing.
- Among the 12,063 people served by CAPE in 2007 who identified a race:
  - Twenty-four percent were African-American; and
  - Two percent were of Hispanic or Latino origin.
- Twenty-one percent of people served by CAPE in 2007 reported they had no private health insurance.

**CLIENT SURVEY DATA** - The following data was collected and are the results of client surveys distributed to Community Action Agencies' clients. For more information see the Primary Data section of this report.

## **KEY FINDINGS**

- Eighty-six percent of CAPE's client survey households were employed.
- Thirty-eight of CAPE's client survey households were single parent female-headed households and 3 percent of CAPE's client survey households were single parent male-headed households.
- Thirty-five percent of CAPE's client survey respondents had less than a high school diploma or GED, and 6 percent of CAPE's client survey respondents had postsecondary education.
- Sixty-one percent of CAPE's client survey respondents had incomes below 75 percent of the FPG. Seventy-one percent had incomes below 100 percent of FPG and 29 percent had incomes above 100 percent of FPG.

## **CLIENT SURVEY VALIDITY**

- CAPE received 241 total surveys, providing a 95 percent confidence level and a 6.26 confidence interval.
- The majority of client surveys were randomly mailed to Community Action Agency (CAA) clients across the state. CAAs with budget limitations were given the option to directly distribute surveys to clients, but were asked to ensure that surveys were distributed randomly and could be returned confidentially.
- The demographics of 2007 client survey respondents were similar to the overall Indiana Community Action Network (Network) population, indicating that the sample used is valid and representative of the population the Network served. Thus, survey data utilized throughout this

# Narrative 2

## Population

### CAPE

#### 2008 COMMUNITY NEEDS ASSESSMENT

**POPULATION, INCOME, AND POVERTY STATISTICS** - This data was collected from the U.S. Census Bureau and from STATS Indiana. For more information see the Secondary Data section of this report.

**CLIENT SURVEY DATA** - The following data was collected and are the results of client surveys distributed to Community Action Agencies' clients. For more information see the Primary Data section of this report.

#### SERVICE AREA

- CAPE's service area is in the southwest region of Indiana and includes the following counties: Vanderburgh, Posey, and Gibson.

#### POPULATION STATISTICS

- In 2007, the population in CAPE's service area was 233,441 people. Seventy-five percent of the service area population lived in Vanderburgh County. Gibson County's population was 32,754 and Posey's population was 26,262.
- The CAPE service area is 8th largest among the State's CAAs based on population. Vanderburgh County is the 7th most populated county in the state. The other counties rankings ranged from 49th to 60th.
- The City of Evansville is the most populous city in CAPE's service area and the 3rd largest in the state with 115,738 people. Evansville's population accounts for 50 percent of the entire service area's population. No other counties in CAPE's service area have a population over 10,000 people.
- The population growth rate of CAPE's service area from 1990-2000 was the 7th lowest in the state (4 percent). This figure is below the 10 percent growth rate for the state as a whole.

- The population growth rate of CAPE's service area from 2000-2007 was the 13th highest in the state (1 percent). This figure is below the 4 percent growth rate for the state as a whole. Vanderburgh and Posey Counties are estimated to have lost 2 and 3 percent of their population from 2000 to 2007, respectively.
- Based on its population characteristics, CAPE is very comparable to four other Indiana CAAs: Community Action of Greater Indianapolis (CAGI); Community Action of Northern Indiana (CANI), Northwest Indiana Community Action Association (NWICA); and Real Services (REAL).
- The number of single-parent female-headed households has grown substantially in each of the counties in CAPE's service area. Vanderburgh County experienced a 13 percent increase in single-parent female-headed households from 1990 to 2000. This figure is below the statewide average of 23 percent. Each of the other counties in CAPE's service area experienced an increase in single-parent female-headed households of at least 20 percent between 1990 and 2000.
- In 2007, 14 percent of CAPE's service area population was 65 years old and older, which is higher than the statewide average of 12 percent. Vanderburgh and Posey Counties had a higher percentage of the population who was 65 years old and older at 15 percent. Thirteen percent of the Posey County population was 65 years old and older.
- CAPE had a higher percentage of people 65 years old and older in their service area population than four other of Indiana's CAAs: CAGI (10 percent); CANI (12 percent); NWICA (13 percent) and REAL (12 percent).
- Seven percent of CAPE's service area population was African-American. The highest proportion of African-Americans resided in Tippecanoe County (3 percent). The other three counties in CAPE's service area had an African-American population of no more than 1 percent. CAPE's service area figures are well below the statewide average of 9 percent.
- Seven percent of CAPE's service area population was African-American, which is a lower percentage than four of Indiana's CAAs including: CAGI (19 percent); CANI (8 percent); NWICA (19 percent) and REAL (7 percent).
- From 2000 to 2007, the Hispanic population in CAPE's service area grew by 28 percent. Vanderburgh County's Hispanic population grew by 27 percent, while Posey County experienced the highest growth rate in the service area with an increase of 50 percent.
- In 2007, 1 percent of the total population in CAPE's service area was of Hispanic or Latino origin. Vanderburgh County has a larger number of individuals who are of Hispanic or Latino origin and the highest proportion of population who are of Hispanic or Latin origin at 1 percent. These service area figures are lower than the statewide average of 5 percent.

## **INCOME STATISTICS**

- In 2007, the median household income (MHI) in CAPE's service area ranged from approximately \$42,000 to \$55,000. Vanderburgh County's MHI was \$42,512, while Posey County had the highest MHI in the region at \$55,562. The statewide MHI in 2007 was \$47,034.

- According to U.S. Census Bureau, in 2007, 12 percent of CAPE's service area population, or 28,547 people, lived below the Federal Poverty Guidelines (FPG), which was \$20,650 a year for a family of four. These numbers have increased from 9 percent, or 21,985 people, in 2000.

## **CLIENT SURVEY DATA ON INCOME**

- Sixth-one percent of CAPE's client survey households had incomes below 75 percent of FPG – less than \$1,073 per month for a family of three in 2007. Seventy-seven percent had incomes below 100 percent of FPG – less than \$1,431 per month for a family of three in 2007 –and only 23 percent of client survey households were above the 100 percent of the FPG.
- Seventy percent of female client survey respondents under 40 years old, who had incomes below 100 percent of FPG, were single-parents.

## **POVERTY STATISTICS**

- In 2007, Indiana's poverty rate was 12 percent. In CAPE's service area, Vanderburgh County had the highest poverty rate at 14 percent, but the other counties in CAPE's service area had a poverty rate of 11 percent or less (Gibson County 11 percent and Posey County 8 percent). The State and all of CAPE's service area saw an increase in poverty from 2000 (Indiana 10 percent, Gibson County 8 percent and Posey County 7 percent).
- The number of people living in poverty in CAPE's service area was the 8th largest among all of Indiana's CAAs, and the service area poverty rate was the ninth highest among all of Indiana's CAAs in 2007. CAPE's service area poverty rate was lower than NWICA (14 percent) but higher than CANI (10 percent); CAGI (11 percent); and REAL (11 percent).
- From 2000 to 2007, the number of people living in poverty in CAPE's service area increased by 6,562 people and the poverty rate increased by 30 percent.
- In 2007, Indiana's child poverty rate was 17 percent. Vanderburgh County had a higher poverty rate than the state average at 20 percent. The child poverty rate for Gibson and Posey Counties are 14 percent and 11 percent respectively. It is estimated that 9,633 children (under the age of 18) in the CAPE's service area were living in poverty in 2007.
- A leading indicator of poverty, particularly for children under five years old, is living in a single-parent, female-headed household. Fifty-two percent of single-parent, female-headed families in Vanderburgh County had incomes below 100 percent of the FPG; ranking this county 18th in the state. Both Gibson and Posey Counties were above the statewide average of 44 percent.
- In 2000, the townships with a higher than average poverty rates in the CAPE service area included: Knight (11 percent), Pigeon (22 percent), and Union (22 percent) Townships in Vanderburgh County; Patoka (12 percent) and White River (11 percent) Townships in Gibson County; and Black Township (11 percent) in Posey County.
- In 2000, the City of Evansville in Vanderburgh County had a poverty rate of 14 percent. This is

higher than the county's 11 percent poverty rate and CAPE's service area poverty rate 10 percent. West Lafayette had 16,039 individuals living in poverty in 2000. This accounted for 70 percent of CAPE's total service area.

- In 2000, 7 percent of individuals 65 years old and older in Tippecanoe County had incomes below 100 percent of the FPG. This ranked Tippecanoe County 61st in the state. Posey County had 10 percent of individuals 65 years old and older with incomes below the FPG and was the only County in CAPE's service area with a rate higher than the statewide average of 8 percent.
- In 2007, 29 percent of Hoosiers (61,169 people) were living below 200 percent of the FPG - \$41,300 for a family of four.
- Twenty-eight percent, or 61,412, of the CAPE service area population lived below 200 percent of the FPG in 2007. Three-fourths of these people (46,719 people) lived in Vanderburgh County. The percentage of the population living below 200 percent of FPG was 27 percent for Gibson County and 23 percent for Posey County.
- Studies have shown that it actually takes about twice the FPG for a family to actually be economically self-sufficient. The Indiana Self-Sufficiency Standard is a detailed calculation of the amount of income a family needs to meet all its basic needs and is roughly twice the federal definition of poverty or 200 percent of the FPG. When these incomes and wages are used, the actual numbers and percents of people who need assistance increases dramatically. According to the 2005 Indiana Self-Sufficiency Standard, a family of four (two adults, one infant, and one preschooler) in Gibson County would need to make \$2,695 monthly or \$32,343 annually to reach economic self-sufficiency. For this same family type in the remainder of CAPE's service area, it would take the following for this family to meet economic self-sufficiency: Posey County \$3,009 monthly or \$36,117 annually; and Vanderburgh County \$3,206 monthly or \$38,472 annually.
- In 2006, the number of people receiving Food Stamps totaled 23,129 – a 56 percent increase from 2002.
- In 2006, 50,262 families in Indiana received Temporary Assistance to Needy Families (TANF) benefits marking a decrease of 3 percent from 2005.

## **CLIENT SURVEY DATA ON POVERTY**

- Forty-seven percent of CAPE's client survey respondents received Food Stamps. Of those who received Food Stamps 34 percent were employed.

## **ECONOMIC IMPACT**

- Fighting poverty is not just altruistic; it is a key economic development strategy. Based on client survey data, if we could move each of the families served by CAPE to at least 100 percent of the FPG, it would generate an additional \$104,675,437 per year in income. This money would then be spent in the community, further stimulating the local economy.

# Narrative 3

## Education and Employment

### CAPE

#### 2008 COMMUNITY NEEDS ASSESSMENT

**EDUCATION AND EMPLOYMENT** – This data was collected from each agency’s Community Services Block Grant (CSBG) data as reported on to the State and Federal governments, 2008 Indiana Community Action Agencies client survey data, and the U.S. Census Bureau. For more information see both the Primary and Secondary Data sections of this report.

**CLIENT SURVEY DATA** - The following data was collected and are the results of client surveys distributed to Community Action Agencies’ clients. For more information see the Primary Data section of this report.

#### EDUCATION

- In 2007, 83 percent of Vanderburgh County residents, 25 years old and older possessed a high school diploma. This ranked Vanderburgh County 5th in the state. The two other service area counties were between 80 to 85 percent and ranked in the top half of the state. The state average was 82 percent.
- In 2007, 19 percent of people 25 years old and older in Vanderburgh County had a Bachelor’s Degree. This percentage is equal to the statewide average of 19 percent, which ranked Vanderburgh County 17th in the state. The three other services area counties had from 12 to 15 percent of people 25 years old with a Bachelor’s Degree.
- In 2007, CSBG data showed that 63 percent of clients 25 years old and older possessed a high school diploma or GED. Additionally, 6 percent of clients served by the Indiana Community Action Network (Network) had earned either a two-year or a four-year postsecondary degree. This is an increase from 2004 when 52 percent of clients 25 years old and older had a high school diploma or GED, and only 4 percent of clients had a two or four year postsecondary degree.

#### CLIENT SURVEY DATA ON EDUCATION

- Among the client survey respondents, 73 percent had a high school diploma or GED and 10 percent had a two year postsecondary degree or higher.

- Education level is a major indicator of the earning potential of family income. Among CAPE client survey respondents who were 25 years old and older, those with a high school diploma or GED earned on average about \$203 more per month than those without.

- Postsecondary education is becoming increasingly important to the earning potential of families. In 2007, for CAPE client survey respondents, 25 years old and older, and without any postsecondary education, the average monthly income was \$801. Clients with a two-year postsecondary degree reported a monthly income of \$1,180.

## EMPLOYMENT

- In 2007, CAPE had 121,443 people in the labor force, which was less than a one percent increase from 2000. Vanderburgh County's labor force stood at 91,194 people in 2007, an increase of 1 percent since 2000. Posey County saw a decrease of 4 percent in their labor force over this same time period. The statewide growth in the labor force during this time period was 4 percent.

- In 2007, the unemployment rate in CAPE's service area was 5 percent, making it equal to the statewide unemployment rate of 5 percent. However, this is an increase of 50 percent from 2000 for this service area. Each of CAPE's service counties also saw an increase in unemployment from 2000 as shown in the chart below.

Unemployment Rates		
Counties	2007	2000
Gibson	5%	3%
Posey	4%	3%
Vanderburgh	5%	3%
Indiana	5%	3%

Source: Bureau of Labor Statistics

## CLIENT SURVEY DATA ON EMPLOYMENT

- Among those served by CAPE in 2007, eighty-six percent of all heads of households were working.

- Based on the 841 CAPE client surveys returned, 37 percent of respondents were employed. Forty-seven percent of single-parent survey respondents were employed. This is above the statewide average of 44 percent.

- When looking at the CAPE client survey responses for those under 65 years old, the employment rate increases to 44 percent. Additionally, 57 percent of CAPE client survey households, with

adults under the age of 65 years old, had at least one adult working.

- Forty-six percent of single-parent CAA client survey respondents were working.

## **EARNINGS AND OCCUPATIONS**

- In 2007, the median earnings for adult workers in two of the three CAPE counties were below the statewide average of \$23,229. In Floyd County however, the median earnings were \$24,623. The median earnings in Vanderburgh and Gibson Counties were \$21,000 and \$20,999 respectively.
- A key indicator of yearly household income is number of hours worked (increased hours worked having a far greater impact on overall income than an increase in hourly wage). Of those client survey respondents who were employed, over half (59 percent) worked less than 36 hours per week. When accounting for spouses, 54 percent worked less than 36 hours per work. The figure for number of hours worked was less than the statewide average of 63 percent, however, when accounting for spouses, CAPE's clients had nearly the same percentage as the statewide average of 55 percent.
- In 2000, 27 percent of Tippecanoe County's occupations were in the production and transport sectors, this is higher than the statewide percentage of 21 percent. Posey County has a higher percentage of people working in management and professional fields than the state as a whole (30 percent to 29 percent). Both Gibson (22 percent) and Posey Counties (23 percent) had a lower percentage of workers in the sales and office sector than the state (25 percent).

# Narrative 4

## Other Indicators

### CAPE

#### 2005 COMMUNITY NEEDS ASSESSMENT

**OTHER INDICATORS OF POVERTY** - This data was collected from each agency's Community Services Block Grant (CSBG) data as reported to the State and Federal governments, 2008 Indiana Community Action Agencies client survey data, and the U.S. Census Bureau. For more information see both the Primary and Secondary Data sections of this report.

**CLIENT SURVEY DATA** - The following data was collected and are the results of client surveys distributed to Community Action Agencies' clients. For more information see the Primary Data section of this report.

#### HOUSING

- In 2007, 66 percent of the households served by the Indiana Community Action Network (Network) were renters compared to 68 percent of the households served by CAPE.
- A key indicator of poverty is the percentage of household income spent on rent. According to the U.S. Department of Housing and Urban Development, if a person spends over 30 percent of household income on housing their housing is considered to be unaffordable. In 2007, 45 percent of rental households in Indiana spent over 30 percent of their income on rent. In Vanderburgh County, renters spent 49 percent of their income on rent. In the other service counties (Posey and Gibson) renters spent less than the statewide average of 42 percent of their income spent on rent.

#### CLIENT SURVEY DATA ON HOUSING

- In 2007, 70 percent of CAPE's client survey respondents lived in rental units compared to 28 percent of Indiana residents who lived in rental units statewide. Among CAPE client survey respondents, 51 percent spent more than one-third of their income on rent.
- Whereas 26 percent of CAPE's client survey respondents owned their home. This is compared to a statewide homeownership rate of 72 percent in 2007.
- Seventy-three percent of CAPE client survey respondents stated that they were satisfied with

their housing situation. This is below the statewide average of 76 percent.

- Five percent of CAPE client survey respondents experienced homelessness in the last 12 months. When projecting the current rate out to the entire CAPE client population, an estimated 644 area families have experienced homelessness at some point in the last 12 months.

#### **CLIENT SURVEY DATA ON CHILD CARE**

- Access to child care for parents is essential to gain and sustain employment. In 2007, only 13 percent of CAPE client survey respondents used child care services on a regular basis. Of those, 37 percent received assistance in paying for their child care costs. For those respondents under 40 years old, only 22 percent used child care services on a regular basis.
- The use of child care services increased to 28 percent among CAPE client survey respondents who were employed. Child care service utilization increased to 33 percent among CAPE client respondents who worked at least 36 hours per week.
- In 2007, 80 percent of CAPE client survey respondents stated they were satisfied with the care their children received, up from 72 percent in 2004. In addition, 18 percent of CAPE client survey respondents stated they had trouble finding or keeping quality child care services.

#### **CLIENT SURVEY DATA ON CHILD SUPPORT**

- For single-parent families, child support is a crucial income source to help these families meet their basic needs. In 2007, 33 percent of client survey respondents were eligible to receive child support, but less than half of those families (47 percent) actually received their support regularly over the last year.

#### **CLIENT SURVEY DATA ON HEALTH INSURANCE**

- Sixty-seven percent of CAA client survey respondents, who are employed, did not have private health insurance, indicating that the majority work in jobs with little to no health insurance benefits. Additionally, 67 percent of CAPE client survey respondents, who are employed, did not have private health insurance for any member of their family, demonstrating that employer health care benefits are limited or non-existent for workers and their families.
- Many low-income families rely on public health insurance, as 78 percent of CAA client survey respondents throughout the state had at least one member of their family covered by Hoosier Healthwise, Medicaid, or Medicare. The CAPE service area had a lower proportion of families covered by public health insurance, at 72 percent.
- Twenty percent of CAPE client survey respondents stated that neither they as individuals nor their family had private or public health insurance. Projecting that statistic out to the entire CAPE client population, approximately 2,672 families had no health insurance of any kind in 2007.

## CLIENT SURVEY DATA ON TRANSPORTATION

- Thirty-five percent of CAPE client survey respondents do not have a car in working order. Of these, 67 percent considered this to be a barrier or problem, and 66 percent felt they could acquire better employment if they had reliable transportation.

## CLIENT SURVEY DATA ON OTHER KEY INDICATORS

- Seven percent of CAPE client survey respondents stated they had trouble reading or writing English.
- Forty-seven percent of CAPE client survey respondents received Food Stamps. Of those, 54 percent still needed to use food banks occasionally.
- Seven percent of CAPE client survey respondents stated that either they or a member of their family had been a victim of domestic abuse in the last 12 months.
- In our ever-increasing digital society, computer skills and access to the Internet are becoming increasingly important to economic success. Forty-one percent of CAPE client survey respondents had access to the internet.
- Twenty-six percent of CAPE client survey respondents stated they could remember receiving government assistance as a child.

## CLIENT SURVEY DATA ON NEEDS

- In 2007, over one-third of CAA client survey respondents (38 percent) statewide had a major family or social service need. CAPE's percentage was higher than the state's at 46 percent.
- Below are the top eight needs of families, as identified by clients themselves. The percentages are based on the number of families who stated they had social services needs, and identified the particular need from the categories listed in the chart below.

Indiana		CAPE	
Emergency rent, utilities, shelter	57%	Emergency rent, utilities, shelter	52%
Food or nutrition	35%	Know more of what's available	24%
Know more of what's available	30%	Education	24%
Health-related or medical	29%	Transportation	24%
Transportation	26%	Employment Services	20%
Other	25%	Food or Nutrition	20%
Housing situation improvement	24%	Health-related or medical	16%
Education	21%	Help with budgeting	16%

## Sources

### CAPE

#### 2008 COMMUNITY NEEDS ASSESSMENT

#### SOURCES AND INSTRUCTIONS

##### CLIENT SURVEY DATA

- Survey data used throughout this assessment was generated from a statewide process conducted in late 2007 and early 2008, as well as an earlier process the first half of 2005. Each Community Action Agency surveyed a random sample of their service population. The raw data results of these surveys have been included.
- One can access the data electronically in the “IN-CAA Survey Data 2008” file. Several base reports are included in the “Reports” section. This section also allows the user to run base reports by agency, and for the client survey report, by program, county, city, and zip code. Additionally, all outcome and open-ended survey data is available in reports in this section.
- Some of the narrative provided previously is based on cross tabs built within the survey database. These can be found in the “IN-CAA Survey Data 2008” file, and the user has the option to build more of their own. To access these, hold the “shift” key while double clicking on the file, and click on “queries”. The relevant queries begin with the filename “Crosstab” followed by the corresponding section in the narrative (such as “Pop” or “EmpEd”), followed by the subject of the query.

##### SECONDARY DATA

- Sources and links to secondary data are provided in the last worksheet of the file “CAA Secondary Data 2008.”
- Some analysis in the narrative section was provided using geographic comparison tables, which can be accessed through the Census Bureau web site. For Indiana statistics, Stats Indiana is the easiest way to get this information. Simply go to the web site (<http://www.stats.indiana.edu>), and you can search for data by topic, geography,

or time period.

- Another useful feature on the Stats Indiana web site is the county profiles. With these, one can get a snapshot of key data for each county, and one can get a profile for a custom region by combining county data. Again, go to the web site (<http://www.stats.indiana.edu>), click on “Counties” under the Indiana tab, and here, select the county. To create a custom region, click on “Custom Region,” and hold the “shift” key while selecting counties. When finished, click “Get Profile.”

## **MAPS**

- All of the maps provided in this publication are from the Stats Indiana web site, and there are many more on the site than provided here. To access them, go to the web site (<http://www.stats.indiana.edu>), and on the left there is a section called “Find Maps”. Click on “Thematic Maps” to choose from a wide list of maps with various data elements, or click on “Boundary Maps” to choose from a wide list of maps based on geographic boundaries.

## Comparison Groups

## CAA Comparison Groups

- For the purposes of comparison, we have grouped CAAs into 5 groupings based on population characteristics.

<b>Group 1</b>	<b># of Counties</b>	<b>Service area pop ranks</b>	<b>Population Densities</b>	<b>Other Key Attributes</b>
CAGE CANI CAPE NWICA Real Services	3-6	1-6	200+ per sq mile	Each have one of the seven most populous counties in the state, two have two of the seven. Each has at least one major city at or above 100,000 people.
<b>Group 2</b>	<b># of Counties</b>	<b>Service area pop ranks</b>	<b>Population Densities</b>	<b>Other Key Attributes</b>
Area IV Area V CAPECI Human Services Inc. SCCAP WICAA	3-5	5-12	120-153 per sq mile	Each has a mid-major city with over 37,000 people, and at least one mid city over 10,000. Human services is a little unique, with two mid-majors and four mid, and Area IV has two mid-majors.
<b>Group 3</b>	<b># of Counties</b>	<b>Service area pop ranks</b>	<b>Population Densities</b>	<b>Other Key Attributes</b>
ACTION CASI Jobsource	1-3	10-15	200+ per sq mile	Each has a number of mid-major cities proportionate to the number of counties served.
<b>Group 4</b>	<b># of Counties</b>	<b>Service area pop ranks</b>	<b>Population Densities</b>	<b>Other Key Attributes</b>
CPS ICAP OVO NCCAA PACE	3-6	13-17	64-115 per sq mile	Top two cities in each area combine for over 20% of population. Each with a number of cities at or above 6,000 proportional to the number of counties served.
<b>Group 5</b>	<b># of Counties</b>	<b>Service area pop ranks</b>	<b>Population Densities</b>	<b>Other Key Attributes</b>
COWI Hoosier Uplands Lincoln Hills SIBOC Tri-Cap	3-6	18-24	45-95	Top two cities in each area make up less than 20% of total population.

## The Promise of Community Action

Community Action changes people's lives, embodies the spirit of hope, improves communities, and makes America a better place to live, We care about the entire community, and we are dedicated to helping people help themselves and each other.

The Community Needs Assessments is funded in part by The Indiana Housing and Community Development Authority with CSBG-D funds.  
For more information about IHCD please visit [www.in.gov/ihcda/](http://www.in.gov/ihcda/).
